Our mission is to provide education, training, and research in our community. Thank you for planting a seed of hope and encouragement in youth like **Alexa** who engage with the **No More Empty Pots** Community Education programming!

Alexa is an energetic third grade student at [Leland & Dorothy Perkins's Center](#) in Omaha Public Schools. She attends the after school program at 3:00pm (science, technology, engineering, art, and math), gardening, and culinary education taught by the **No More Empty Pots** through [Culinary Arts Club](#). During gardening sessions, Alexa shows how much she loves bugs, especially the "friendly" ones! She mentioned ladybugs, beetles, and even dragonflies. Community Education resources encourage Alexa to explore her interest in bugs as often as possible. Each session equips her for science and a potential career pathway in entomology.

Thank you for supporting the **No More Empty Pots** by making a difference for youth like Alexa, whose interests are ignited and encouraged through hands-on education. Our collective future is bright for our youth!

Spring is Around the Corner: Support Community Gardens with Donated Mulch!

With the [Spring Gardening](#) program full for a second year, we cannot emphasize enough that Omaha's compost feed system, as a whole, has a good chance of meeting the demand for Mulch's composting facility to donate to participating community gardens for the **No More Empty Pots** "mulch garden" as we prepare for planting this spring! Subscribers also get access to the **Online Garden** program's progress report, along with 10% off their mulch, soil, and fertilizer options.
