Alisha Wright is a natural chef and thanks to her [Master Gardener Fellowship](#) (MFC) with our region's plant organization, The MFC, she's gained skills and experience in research, design, and growing. As a full-time chef, Alisha offers professional, affordable, nourishing, and joyful experiences. She's also been diagnosed with diabetes and has been diagnosed with a connective tissue disorder. She's a member of the Garden Park neighborhood.

She's been thinking about creating and exploring with the garden in her neighborhood. She's been thinking about creating and exploring with the garden in her neighborhood. She's been thinking about creating and exploring with the garden in her neighborhood. She's been thinking about creating and exploring with the garden in her neighborhood.

"I've been in the garden because it was my dad's," Alisha said. "This space just brings me peace and comfort, and even to the day to day life with others."

Through engaged leaders and members like Alisha who are amplifying the abundance, the Garden Park is creating a more vibrant community together. We are grateful for Alisha who is sharing her knowledge, resources and compassion to serve to others.

Head Stop: Solar Panels on the Rooftop

The Garden Park recently received funding through [Garden & Horticulture Society](#) to install solar panels on the roof of the Garden Park building.

"The Garden Park is excited to receive this investment from the Garden Together members and donors," says William. "Having solar panels on the roof of the Garden Park will help complete the original master plan of the 100-plus-year-old building for improved sustainability and energy efficiency through renewable energy."
